

Candidates skilled in the
Newest technologies --
From a company that still believes in
Old-fashioned service and value

**Since 1968, the team behind Area Networks
has provided quality employment services
to businesses throughout Greater Cleveland**

From one of the leading names in Cleveland's employment industry comes contract temporary staffing and direct hire placement for technology-related companies.

Who is better qualified to recruit for your IT, engineering and professional openings than a company founded in the staffing industry but dedicated to providing total IT solutions?

To adapt to ever changing technologies, companies must compete for top talent. With our experience, proprietary applicant database, and access to a wide variety of recruiting resources, Area Networks Staffing Division can help you make that connection and streamline your entire hiring process.

Need some direction? Our consultants can also review your project requirements and help you consider available technologies. Once you have a detailed plan in place, we can screen available applicants and present you with a selection of candidates who will see the project through to completion.
